Village of Matherville

June 24, 2024

Village of Matherville Village Water Residents:

In the upcoming months, the Village of Matherville will be installing new water meters in all homes that are connected to the Village water system. These upgrades are needed due to many meters being non-functional. Also, by installing new meters, this enables the Village of Matherville to upgrade to online bill pay once all meters are installed.

Tony's Plumbing will be installing these meters for the Village. A representative from the company will be contacting all homeowners to schedule an install date and time.

This is mandatory for all water users. Thank you for your cooperation during these upgrades to our Water System.
